

Capability Statement

About JWS

JWS Industries is a Western Australia-leading supplier in fabrication, Structural Mechanical Piping (SMP) projects, shutdown execution and maintenance services to the mining, resources and infrastructure sectors.

Backed by more than 15 years of industry experience and ISO-certified management systems, we are committed to delivering safe, high-quality solutions that drive successful project outcomes for our clients. We are built for demanding environments where reliability matters and where every day on-site requires clear communication, experienced personnel, and careful execution.

Our team of highly skilled professionals brings decades of industry experience, technical expertise, and a strong work

ethic to every engagement. From large-scale construction and shutdown projects to specialised fabrication and repairs, we approach each scope with precision, efficiency, and a focus on client satisfaction.

At JWS, we believe in delivering outcomes that go beyond compliance - outcomes that create value, reduce risk, and stand the test of time. We collaborate with our clients every step of the way, with a focus on building lasting partnerships and providing tailored, cost-effective solutions that exceed expectations and endure well into the future.

“Delivering when it matters”

Our Mission

To deliver high-quality engineering solutions, supported by responsive service and reliable expertise across every stage of our clients' projects.

Complete Services, Built on Client Partnership

JWS Industries delivers fully integrated engineering and fabrication solutions across three core pillars: **Fabrication, Structural Mechanical Piping (SMP), and Shutdown Execution and Maintenance.** With decades of industry experience, we combine technical expertise with a strong commitment to quality, ensuring safe, efficient, and cost-effective outcomes for projects of every scale and complexity.

Our capabilities include welding and fabrication, spooling, inspection services, mechanical fitting, and equipment support. This diverse range of services allows us to provide customised solutions for both planned works and urgent, time-critical requirements. Every project is executed with precision and strict compliance with industry standards, delivering consistent, high-quality results.

We specialise in complex shutdowns, large-scale construction, and high-risk environments—leveraging advanced technology, proven methodologies, and a highly skilled workforce to minimise downtime, optimise performance, and extend asset life.

With a strong track record across Australia's industrial, mining, and resource sectors, JWS

is recognised for its technical excellence, safety-first culture, and collaborative approach. Whether delivering shutdown services, structural fabrication, or mechanical rebuilds, we partner with our clients to achieve reliable outcomes that enhance operational performance and create lasting value.

Why Choose JWS?

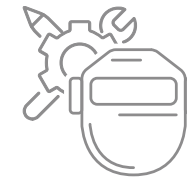

Safety-First and Collaborative

Our commitment to safety is fundamental, upheld through ongoing training, compliance measures, and field leadership. We partner with you to achieve success, aligning with your systems and goals.

Quality Without Compromise

Backed by ISO-accredited systems, we ensure quality at every step. With robust QA/QC, traceability, and inspections, we deliver right the first time, reducing delays and rework.

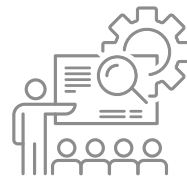

End-to-End Capability

We deliver integrated solutions across welding, fabrication, QA/QC, mechanical, and procurement. Fewer contractors mean less risk, tighter control, and seamless delivery from mobilisation to handover.

Proven Track Record

From new builds to upgrades, we are trusted by major contractors on some of WA's most complex projects. We deliver safely, consistently, and to the highest standards, even under pressure.

Workforce Depth and Flexibility

Our skilled workforce scales with your needs. From welders to fitters, we provide site-ready professionals who adapt quickly to changes in scope, schedule, and resourcing.

Agility and Responsive

We move fast without cutting corners. Whether mobilising, adapting to new timelines, or meeting urgent demands, we keep your project moving forward.

Our Services

Fabrication

JWS Industries provides workshop and site fabrication services for structural steel, pipework and industrial components. Our detailed scheduling and robust quality systems ensure all fabrication aligns with client specifications and project requirements.

Supporting the full project lifecycle, from planning through to installation and commissioning, we work closely with clients and project teams to ensure components are delivered ready for safe, efficient, and timely installation.

“ We support both standalone fabrication scopes and large-scale site projects. ”

Core capability includes:

- Structural steel fabrication
- Pipework fabrication and pipe spooling
- Welding and coded welding services
- Surface treatment and finishing
- Workshop fabrication and site-based fabrication
- Project-specific fabrication packages

Our Services

SMP Projects

JWS delivers Structural, Mechanical and Piping (SMP) installation services across a diverse range of projects. We work in close partnership with client project teams to ensure all work is executed safely, efficiently, and in line with project schedules.

Our SMP capability supports construction projects, plant upgrades, and infrastructure developments. Through strong collaboration and a disciplined approach to execution, we ensure all installations meet engineering specifications and site standards.

“SMP packages customised to your project specifications.”

Core capability includes:

- Structural steel installation
- Pipework installation and pipe spooling
- Site welding fabrication
- Coating and corrosion protection
- Installation of mechanical packages
- Brownfield and greenfield project support

Our Services

Shutdown Execution and Maintenance

JWS delivers maintenance and shutdown execution services designed to minimise downtime and support safe, reliable operations. We understand the planning, coordination and execution required to deliver work during critical shutdown windows.

Our team works closely with clients to ensure maintenance and shutdown scopes are delivered safely, on budget and on schedule.

“Our team supports both ongoing maintenance services and major shutdowns across Western Australia.”

Core capability includes:

- Shutdown planning and execution
- On-site maintenance support
- 24/7 shutdown response capability
- Rotating equipment maintenance
- Fabrication and welding
- QA/QC documentation and sign-off

Safety, Quality & Compliance

At JWS Industries, safety and compliance are not just priorities, they are embedded in every aspect of our operations. With multiple ISO certifications and industry recognised accreditations, JWS demonstrates a proven commitment to delivering work of the highest quality while safeguarding people, assets, and the environment.

Zero Harm

Our unwavering commitment to a zero-harm policy means that safe practices are consistently implemented on every project, prioritising the health and well-being of our team.

Certified Excellence

JWS holds ISO 9001, ISO 45001, ISO 14001, and AS/NZS ISO 3834.2 accreditations, reinforcing our ability to deliver compliant, high-quality, and safe solutions that our clients can rely on.

Quality Assurance

Every scope of work is underpinned by robust QA/QC processes, including documentation, inspection, and traceability. These processes ensure deliverables are accurate, reliable, and fully compliant.

Continuous Improvement

We invest in ongoing training, innovation, and process refinement to continually strengthen our systems and uphold industry-leading standards.

“Servicing WA businesses for over 15 years”
